- ☐ My Kamper previously had a suspected case of COVID-19. Date of Diagnosis: \_\_\_\_\_
- ☐ My Kamper has been vaccinated for COVID-19. Date of Vaccination: \_\_\_\_\_

### DEFINITIONS

- "COVID-19" is a highly contagious respiratory disease caused by SARS-COV-2 virus. It is thought to spread from person to person through droplets released when an infected person coughs, sneezes, or talks. It may also be spread by touching a surface with the virus on it and then touching one's mouth, nose, or eyes, but it is less common. (Source: NCI)
- "COVID-19 Symptoms" include fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, and diarrhea. (Source: CDC)
- "Close Contact" is defined as someone who has been within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period. (Source: CDC)

The health and safety of our Kampers is our #1 priority. During the COVID-19 pandemic, we have taken additional steps to avoid exposure including enhanced hand washing, expanded cleaning, and program modifications. Our comprehensive health and safety plan for Summer 2021 is built on six layers of safety-reinforcing measures, such as this Health Screening Form, which helps us protect the health of your child. We also have specific protocols to isolate, confirm, respond, and remove any Kamper or staff with suspected COVID-19. **You can view more measures we're taking by visiting [Kanakuk.com/child-health-safety](https://www.kanakuk.com/child-health-safety).**
